Experience

Project Lead - Chalmers Cards **Civic Tech Toronto**

Chalmers Cards is a guerrilla project that distributes laser-cut wooden information cards to people living in unstable housing conditions in Toronto. The cards explain how to access public resources like free legal aid and financial aid.

Developer - BaseCount **Civic Tech Toronto**

BaseCount is a platform for low barrier emergency shelters to report their current occupancy levels in real time. Right now I'm responsible for building the front facing marketing site and helping with building the UI.

Instructor - Arduino Workshop **HackLab.TO**

Monthly intro to Arduino Workshop, taught together with one other Hacklab Toronto member. We design and build laser-cuttable kits that we distribute with a bunch of basic electronics (servo, led, switch, etc.).

Education

OCAD University
Class of 2018

Skills

Development

HTML, JavaScript, CSS
Aframe.js, p5.js, Unity3d
GNU Linux

Electronics

Arduino, Soldering,
Circuitry

Rapid Prototyping

3D Printing,
CNC Laser-Cutting

Prototyping

Shop Physical Prototyping,
Sketching

Graphics

Inkscape, Illustrator,
Photoshop

Bachelors of
Industrial Design
